

## ADRENA 2021 New Features: Version 18

	First	Std	Pro
Routing: scanning angle possible beyond 180°	X	X	X
Polar modification: apply percentages in the tables	X	X	X
Forecast: Iridium Go connection taken into account	X	X	X
Central connection: connection to a Zeus directly via GoFree (Ethernet and Wifi)	X	X	X
Central connection: send wp to gps if the GPS is read through the central unit	X	X	X
GPS connection: the name of the waypoints sent is now 20 characters long.	X	X	X
GPS connection: name of the routes is sent in clear text (previously just the number)	X	X	X
Tracks: possibility to choose the duration of the track loaded at launch over 24 hours, the current day or none	X	X	X
Tracks and routings: quick access to the last 4 loads	X	X	X
Routing board: right-click in the histogram to reschedule forecasts	X	X	X
Numerical data: availability of the comparison between predicted wind and measured wind		X	X
Routing: taking into account reversing or anchoring if the current is too strong		X	X
Possibility to apply a correction in % on the currents by family (SHOM, Proudman, ...)		X	X
Routing overview: average time on selected routings; possibility to show / hide / unload		X	X
Histograms: possible re-centering on a portion of the screen		X	X
Geo-referenced images: new management of favourites for simplified and more complete access		X	X
Georeferenced images: possibility of transforming a georeferenced image into a roadbook		X	X
Numerical data tab: use of all available space		X	X
Georeferenced images: possibility of resetting a non-horizontal image			X
Routing: taking into account a slowing down of the boat for a certain period of time			X
Routing: calculating the best time to plan an intervention or penalty			X
Routing: seeking a better performance by temporarily slowing down the boat			X
Routing board: possibility of inserting comments in the board			X
Trace and routing tooltips: data appearing in the tooltips can be configured			X
Historical grib: loading of CEP historical grib			X
NOAA forecasts: availability of ensemble forecasts at 0.25° / 3h			X
Roadbooks: possibility to indicate a movement for a drawing (movement of the area over time)			X
Roadbooks and georeferenced images: management of the order in which drawings are displayed on the screen			X
Polar modification: vmg / cartesian / apparent display available			X
