

ADRENA heading for victory in the Volvo Ocean Race!

What do Addis on Puma, Cape on Telefonica, Nelias on Groupama, Oxley on Camper or Salter on Abu Dhabi have in common?

They all spend great part their time eyes glued to their ADRENA software screen!

On shore during the preparation of the race for: the analysis and comparison of different sources of weather, the permanent adjustment of polar, Sailect and speed, the

best test configurations, performance analysis, routings ...

At sea, in front of the computer, for:

routing, performance monitoring, meteorological analysis, anticipating changes sailing through Sailect, monitoring and routing of competitors...

Back on shore for :

the debriefing thanks to the Replay feature and the tools for track analysis..

ADRENA provides them with tools for decision making and performance routings. It is certain now that victory is played between the helm and the chart table. And the battle for the final victory is tight because they are still 4 to be able to win!

ADRENA is not only providing almost all of the fleet but is also an Official Supplier of Groupama sailing team, first French ship engaged since 1993 in this coveted race.

A stopover in France takes place from 16 June to 1 July 2012 in Lorient. At this occasion, ADRENA will be present in the village on the Brittany Ocean racing business network stand. We wish all navigators and teams, fair winds and sea for the final stretch.

The best man win!
