

ADRENA: a global approach that makes the difference!

Test the best racing performance software free

In 5 years, **ADRENA** has made a name for itself in navigation and racing performance software. At the cutting edge of development and innovation and holding close relations with its customers, **ADRENA** was quickly preferred and won the confidence of great names in regatta and offshore racing. More than half of the fleet in the last Vendée Globe had the full **ADRENA** suite on board. In the Volvo Ocean Race, 80% of the boats use Optima Pro. In the same way Thomas Coville, Franck Cammas, as well as routers such as Sylvain Mondon and Richard Silvanni, have found the **ADRENA** software to be the perfect solution adapted to their requirements and serving their performance.

A GLOBAL APPROACH THAT MAKES THE DIFFERENCE

The advantages of **ADRENA**? Without contest the great strength of its offer lies in its global approach. **ADRENA** is the only complete solution on the market to include the wonderful research resources of the Optima software, speed polars and Sailect, as part and parcel of the Adrena navigation software. As a result, it is possible to include real time data on the optimal usage of sails, recorded beforehand, in the navigation program. Thanks to a particularly visual graphic interface, **ADRENA** proves to be a unique aid for making effective decisions and achieving high-performance.

A UNIQUE SOLUTION FOR CREATING POLARS

ADRENA, through its **OPTIMA** software, now offers a unique solution for creating boat speed polars and; above all, making sail comparisons (crossover). Integrating the exclusive **SAILECT** function, different sail configurations can be managed and, most of all, this data can be directly integrated into the boat's navigation and routing. Apart from the obvious uses in racing, this software is also a powerful basic aid for the development of the boat.

UNIQUE ADVANCED FEATURES

At the cutting edge of development and innovation, holding close relations with its customers and in tune with their needs, **ADRENA** continually develops its products to offer the most effective, high-performing and reliable software. Continuing the on-going development of its products, version 6 of the **ADRENA** suite pays even more attention to its ergonomics and includes many features:

➤ **Routing:**

- › Module including waves
- › Display and comparison of gribbs
- › Possible routing for several gribbs
- › Managing of exclusion zones (wind force, wave height, terrestrials, zones defined as dangerous, etc.)
- › Integration of Sailects in the routing table
- › Rotation

➤ **Sailect:**

- › View and optimization of sail use range
- **Graphs:**
 - › Integration of reference tables for settings (heel, stay tension, apparent wind, etc.)
- **Collect:**
 - › Administration and archiving of navigation data
- **Replay:**
 - › Runs through the race again, a unique tool for debriefing and research
- **Trimbook:**
 - › Combined with Sailects, the boat's trim can be viewed and optimized.
- **Roadbook:**
 - › Sailing preparation, MyBible, Definition of special zones
- **Alarms:**
 - › The ADRENA solution includes alarms for all the boat's settings, but also for geographic safety data.

Trying out a solution always being better than long descriptions, ADRENA suggests you test the **Free 30-day trial version** of its full software suite (Tactics & Optima)!

télécharger

Click on the icon to download the software, follow the installation instructions and try it out!

The full ADRENA software suite is a combination of 2 different applications with a variety of different modules:

gamme
tactique

Range of navigation software specially designed for racing, it comes with 4 modules:

- Tactics
- Tactics Pro
- Routing and AIS
- Routing Pro and AIS

gamme
optima

Range of software for creating the real speed polars of a yacht, it comes with 3 modules:

- Optima
- Optima Pro
- Sailect
