ADRENA : Version 11 New Features

Ranges	Optima	First	Standard	Pro
New hardware protection key size « micro »	X	X	X	X
VPP polar curves	X	X	X	X
Polar curves creation through a table	X	X	X	X
Polar curves calculated according to SOG	X	X	X	X
Optima menu : new ergonomy	X	X	X	X
Grib synthesis tool		X	X	X
Air temperature display		X	X	X
NOAA grib file direct download — *Wind, pressure*		X	X	X
NOAA grib file direct download — *Air temperature, humidity*		X	X	X
NOAA grib file direct download — *Atlantic currents*		X	X	X
NOAA grib file direct download — *Waves*			X	X
NOAA grib file direct download — *Wind in altitude*				X
Meteograms : all gribs displayed			X	X
iDataNet app : numerical data display from Adrena to iPhone and Ipad			X	X
Special course track display for race organization			X	X
Waves height and efficiency coefficient saved in routing export file			X	X
Display line of backwards				X
Apparent wind abacus creation				X
Routing target data (CMG, etc…)				X
XML trimbook and sailect import/export				X
Integration of external data from PI				X
Specification of sails in use from an external app (Onboard Assistant)				X
Creation of segments from an external app (Onboard Assistant)				X
Ensemble prediction and historical statistic grib direct download from NOAA (free of charge)				X
